### **EXAMINER'S AMENDMENT**

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Jeffrey Schmidt on 02/10/2006.

The application has been amended as follows:

**In the claims:**

**Claim 56:** Canceled.

**Claim 57:** Canceled.

**Claim 58:** Canceled.

**Claim 59:** Canceled.

**Claim 60:** Canceled.

**Claim 61:** Canceled.

**Claim 62:** Canceled.

**Claim 63:** Canceled.

### ***Election/Restrictions***

Claim 1 is generic and allowable. Accordingly, the restriction requirement as to the encompassed species is hereby withdrawn and claims 4-9, 13-19, 24-35, 37, 39, 43-47, 49-50, 53-55, and 64-66 directed to the non-elected species no longer withdrawn from consideration

Art Unit: 2853

since all of the claims to these species depend from or otherwise include each of the limitations of an allowed generic claim.

In view of the above noted withdrawal of the restriction requirement as to the linked species, applicant(s) are advised that if any claim(s) depending from or including all the limitations of the allowable generic linking claim(s) be presented in a continuation or divisional application, such claims may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Once a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 44 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

### REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

**Referring to claim 1:** In light of the applicant's arguments and after reviewing Kawasaki et al.'s disclosure, the examiner admits that the lower electrode cannot simultaneously include both a compression stress and tensile stress. As a result, Kawasaki et al. cannot support an inference to show that Hashizumi et al.'s lower electrode (*FIG. 12, element BE*) includes both a compression stress and tensile stress.

Therefore, the primary reasons for the indication of the allowability of claim 1 is the inclusions therein, in combination as currently claimed, of the limitation that "at least one of the group consisting of said diaphragm and said piezoelectric element, includes a compression film having a compressive stress, wherein at least a part of a thickness of said compression film is removed in an area opposed to said pressure generation chamber, thereby forming a removal part" is neither disclosed nor taught by the cited prior art of record, alone or in combination.

Claims 2-19, 21-55, and 64-67 are allowed because they depend directly/indirectly on claim 1.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to LAM S. NGUYEN whose telephone number is (571)272-2151. The examiner can normally be reached on 7:00AM - 3:30PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, STEPHEN D. MEIER can be reached on (571)272-2149. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
